SUMMARY

Software Engineer (MS Computer Science, UAB) with full-stack web development and data analysis experience across React, Node.js, MongoDB, SQL, and Power BI. Experienced building and deploying real-time, scalable web applications end-to-end, from database schema design through cloud deployment, as well as cleaning and analyzing data to support business reporting. Comfortable working directly with clients and stakeholders to translate requirements into production-ready solutions.

EDUCATION

University of Alabama at Birmingham (UAB) — M.S. Computer Science *Aug 2024 – May 2026*
Birmingham, AL

Annamacharya Institute of Technology and Sciences — B.Tech Computer Science *Aug 2019 – May 2023*
Kadapa, India

PROFESSIONAL EXPERIENCE

WordPress Developer — Poise Media & Co. LLC *Jun 2026 – Present*
Remote, USA

- Develop and maintain responsive WordPress websites by customizing themes, layouts, and plugins to meet client requirements.
- Configure and integrate third-party plugins (payment gateways, SEO tools, UI components) to extend site functionality.
- Improve site performance and user experience through page-speed optimization and front-end best practices.
- Partner directly with clients to translate business requirements into scalable, user-friendly web solutions.

Data Operations Associate — Intrainz Innovations *Aug 2023 – Dec 2023*
Bengaluru, India

- Cleaned, organized, and validated large datasets using Excel and SQL, improving data accuracy for downstream reporting.
- Wrote SQL queries to retrieve, filter, and analyze data supporting internal business reporting requirements.
- Maintained structured records and performed quality checks to support operational workflows.

PROJECTS

Hexa-Byte — Real-Time Community Messaging Platform *Jan 2026 – Feb 2026*
React, Node.js, Socket.IO, MongoDB, Tailwind CSS, Redis

- Built a real-time messaging platform supporting concurrent chat rooms with instant message delivery via Socket.IO and JWT-secured REST APIs and WebSocket connections.
- Designed optimized MongoDB schemas for fast reads on chat history and room discovery, increasing message delivery accuracy by 28%, and integrated Algolia for full-text search across messages and rooms.
- Improved scroll performance on high-volume chat threads using TanStack Virtual, and used React Query for optimistic UI updates on message send/receive.
- Added Upstash Redis rate limiting to protect APIs from abuse, Cloudinary for optimized media uploads, and Resend for transactional email notifications.

E-Commerce Full-Stack Web Application *Nov 2025 – Dec 2025*
React, Node.js, Express, MongoDB, Railway, Vercel

- Built and deployed a full-stack e-commerce platform with user authentication, product catalog, and order management.
- Deployed backend on Railway and frontend on Vercel with secure CORS configuration for cross-origin API access.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Tailwind CSS, Material-UI

Backend & APIs: REST APIs, Socket.IO, JWT Authentication, WebSockets

Databases: MongoDB, PostgreSQL, SQL

AI Tools: Cursor, v0.dev, Bolt.new, Clerk

Cloud & Dev Tools: Git, VS Code, Vercel, Railway, Firebase, WordPress, Power BI
